**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Title: Please rewrite the title to read:

-- CONTROL DEVICE INCLUDING CONNECTING DEVICE FOR REWRITING  
MEMORY REGION --.

***Allowable Subject Matter***

2. Claims 1-6 and 13-14 are allowed.
3. The following is an examiner's statement of reasons for allowance: the present invention features a control device for controlling an electronic device having non-volatile memory means having a region with a portion where data can be electronically rewritten.

Closed related prior art, that teaches similar and co-relating features, include:  
US 6,505,280 (Terada) teaches memory-writing device which can simply and reliably write desired data to a nonvolatile memory of an electronic device, where connection is made with an ECU to perform write processing to write data from the

memory-writing device to a flash ROM by copying a write-control program from the external portion to a RAM.

"Information On Reprogramming Capability #73-65-13 (Mar. 6, 1997)," General Motors Corp., Doc. ID # 248550, 4 pgs.

However, taken in light of the specification, none of the prior art of record teaches the claimed subject matter:

(as recited in claim 1) control means electrically connected to a socket and memory means for executing a control program to control an operation of the electronic device, said control means initially executing the connection judgment program data, and when it is determined that the external memory is connected to the socket the control means executing the writing program data so that at least a portion of the control program data stored in the first memory region of the memory means is rewritten to external memory medium data stored in the external memory.

(as recited in claim 14) rewriting means memorized in a boost area of EEPROM and writing data memorized in the EPROM to a predetermined area of the EEPROM, and judgment means memorized in the boost area of the EEPROM and judging whether the EPROM is connected to a socket, and control means for executing the judgment means when the control device is turned on,

said control means executing the rewriting means when it is judged that the EPROM is connected to the socket.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pierre-Michel Bataille whose telephone number is (571) 272-4178. The examiner can normally be reached on Mon, Tue-Fri (8:00A to 5:30P).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew M. Kim can be reached on (571) 272-4182. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
